PROFILE

Detail-oriented and passionate Web Developer with 2+ years of experience, proficient in a range of modern technologies including React, TypeScript, JavaScript, Tailwind, Express.js, Node.js, and MongoDB, with a strong foundation in building dynamic web applications, implementing scalable user interfaces and RESTful APIs. Demonstrated ability to work collaboratively in a team environment, driven to deliver high-quality projects on time. Committed to continuous learning and improvement in web development practices.

SKILLS

- Front-End Technologies: JavaScript, React, Next.js, Tailwind CSS
- Back-End Technologies: Node.js, Express.js, MongoDB
- Programming Languages: TypeScript, Java, Python
- Development Practices: Responsive Design, RESTful APIs
- Version Control: Git, GitHub
- Soft Skills: Strong problem-solving, Collaboration, Effective communication

WORK EXPERIENCE

Self-Employed – [2022- Present]

- Developed and maintained several responsive web applications, utilizing modern JavaScript frameworks to enhance user experience and functionality.
- Collaborated with peers on various projects to implement best practices in clean code and version control processes.
- Engaged in continuous learning to stay updated with emerging technologies and trends in web development.

PROJECTS

Chat app

Objective: real time communication application that allows users with seamless message transfer

- Key Features:
 - Responsive Design: Optimized for all devices, providing a user-friendly experience on desktop.
 - Notifications: Real-time notifications for incoming messages and other important events, keeping users informed.
 - Group Chats: Ability to create and manage group conversations, facilitating team discussions and collaboration

Technologies Used: React, Node.js, Express.js, MongoDB, Chakra UI, Socket.io

Shopping Cart app

Objective: The application is designed to provide users with a personalized and efficient shopping journey, leveraging the power of modern web technologies to enhance performance and user engagement.

- Key Features:
 - User-Friendly Interface: Intuitive design that makes navigation effortless for all users.
 - Responsive Design: Optimized for various devices, offering a consistent experience whether on desktop, tablet, or mobile.

Technologies Used: React, Typescript

BLOG app

Objective: The blog application serves as an intuitive platform for users to efficiently organize their daily activities and long-term projects. By leveraging a modern tech stack, it ensures a seamless user experience and robust performance.

- Key Features:
 - User-Friendly Interface: With React, the application boasts a dynamic and responsive design, allowing users to easily navigate and manage their tasks.
 - Data Management: MongoDB provides a flexible database solution that supports complex data structures, ensuring that users' lists and tasks are securely stored and easily retrievable.
 - Backend Efficiency: Built on Node.js and Express.js, the backend is optimized for fast processing and reliable connectivity, allowing updates and interaction with the database.

Technologies Used: React, MongoDB, Node.js, Express.js

Tic Tac Toe

Objective: game designed for seamless use of react library

- Key Features:
 - User-Friendly Interface: Intuitive design that makes navigation effortless for all users.
 - Responsive Design: Optimized for various devices, offering a consistent experience whether on desktop, tablet, or mobile.

Technology Used: React

Weather app

Objective : This weather app aims to be not just a tool for checking the forecast, but a comprehensive and enjoyable experience that enriches users' daily experience

- Key Features:
 - Real-time Data: Integration with reliable weather APIs ensures that users receive the most up-to-date weather information, including current conditions, forecasts, and alerts.
 - Responsive Design: Optimized for various devices, offering a consistent experience whether on desktop, tablet, or mobile.

Technology Used: React

CERTIFICATIONS AND AWARDS

React Development Certification [KIST] – [2024]

- Completed a comprehensive program focused on React and modern web development practices, enhancing skills in building robust applications.

Linux Training [KIST] – [2023]

- This comprehensive Linux training program at KIST is designed to equip participants with the essential skills needed to navigate and operate within a Linux environment efficiently

EDUCATION

Kathmandu Institute of Science & Technology College

Bachelor of Information Management(BIM) [2021-2024]

- **Course Details** : JavaScript, Python, Artificial Intelligence, OOP with Java, Data Structures and Algorithms, C Programming, PHP, Networking, DBMS, Software Design & Development
